

# Series 388-3106/33

## Blackboard Ink, black

The blackboard ink Series 388-3106/33 was developed for classic blackboard applications. On suitable substrates, a durable, resistant coating is created which can be written on with chalk reversibly and in a long-term manner. Typically, the series is used to produce full-surface or partial labelling fields for promotional material in the catering sector and is characterised by its good acceptance of chalk and easy cleaning.

On request, besides black, nearly any other color shade can be realised using this technology.

### Specifications

<b>Thinner</b>	Series 300-017
<b>Addition ratio</b>	15–30 % by weight
<b>Retarder</b>	Series 300-018
<b>Addition ratio</b>	max. 20 % by weight
<b>Hardener</b>	-
<b>Addition ratio</b>	-
<b>Cleaner</b>	Series 300-URS
<b>Mesh</b>	77.55 to 100.40
<b>Drying</b>	Air / Continuous dryer
<b>Substrates</b>	See Technical Data Sheet Series 388
<b>Indoor / outdoor use</b>	Indoor
<b>Further processing</b>	Punching, cutting, laminating, creasing and grooving, forming / embossing, folding
<b>Overprintability</b>	Yes
<b>Available quantities</b>	1 kg, 5 kg
<b>Shelf life</b>	24 months
<b>Others</b>	Stir well before use.

**Important information:** Our technical advice whether spoken, written, or through test trials corresponds to our current knowledge to inform about our products and their use. This is not meant as an assurance for certain properties of the products nor their suitability for each application. You are, therefore, obliged to conduct your own tests with our supplied products to confirm their suitability for the desired process or purpose. The selection and testing of the ink for specific applications is exclusively your responsibility. Should, however, any liability claims arise, such claims shall be limited to the value of the goods delivered by us and utilized by you with respect to any and all damages not caused intentionally or by gross negligence.
