

PRODUCT GROUP 300

Series 373-003

1-Component Anti Slip Varnish

This solvent-diluted 1-component anti slip varnish offers the perfect solution for printing of surfaces with anti-slip effect. The range of application of this special varnish system – with its full or partial area creation of haptic effects - goes from functional applications on mouse-pads and placemats, eventually also serving plates to the purely visual print-finishing of advertising and office material. The desired print properties are reached on various primered/pre-treated PP-materials, PVC-substrates and other plastics. This 1-component anti-slip varnish is **not suitable** for application of floor graphics!
