

# Series 371-002

## Magic Flash, photosensitive varnish

With this special photosensitive varnish Series 371-002 it is possible to print invisible information, which can only be made visible on photos by using a flashlight. It offers a very good opportunity to customize your printings and the message will remain fresh in the memory of the recipients for a long time.

To guarantee that the print is invisible in the inactive stage, we recommend to print Series 371-002 exclusively on a white substrate. An adjustment for dark substrates is possible upon request.

### Specifications

<b>Thinner</b>	Series 300-017
