

**easyPROTECT 2.0**

Highly Resistant 2C Protection Varnish, water-based

**YOUR ADVANTAGES**

- › Long-term protection for digital prints
- › Very flexible
- › High chemical resistance
- › User-friendly formulation
- › Tested on third-generation HP Latex Inks

**easyPROTECT** *easyPROTECT 2.0* is a high-gloss, chemically cross-linking and extremely resistant protection varnish for increasing the longevity of digital prints and various printing substrates. Typical applications include digital printing films, tarpaulins, advertising banners and fabric mesh printed using solvent-based, UV curing or latex inks. *easyPROTECT* protects your digital prints, keeping them bright and vibrant during long-term outdoor use.

**Excellent resistance**

The protection varnish provides excellent resistance against alcohol, benzene and alkaline cleaners. Extensive tests have verified that cleaning with spirits or aggressive cleaning agents does not damage the protection varnish. Highly resistant to all kinds of weather and very elastic, *easyPROTECT* is ideal for protecting flexible materials such as tarpaulins on trucks and mesh on buildings.

**Use with HP Latex Inks**

In addition to all the usual inkjet inks, this protection varnish also provides excellent results in combination with third-generation HP Latex Inks.

**Processing and pot life**

*easyPROTECT 2.0* is user friendly with easy roller/spray application. Once the hardener has been added, the pot life is approximately four to eight hours. Processed

properly and used in combination with high-quality printing substrates, the varnish can increase the longevity of printed products used outdoors to up to five years.

**Flexible coating for superb resistance**

Tarpaulins printed with inkjet inks and protected with *easyPROTECT* are extremely resistant to high mechanical stresses.

**Applications**

Typical applications for *easyPROTECT 2.0* include:

- › Tarpaulins for trucks
- › Advertising banners
- › Stand-up displays
- › Facade coverings

**High-gloss and matte versions**

In addition to the high-gloss version, Series 482-6700, *easyPROTECT 2.0* is also available in a matte version, Series 482-6700/MT.

**Thorough documentation**

Printcolor has many years of experience in water-based protection varnishes. Our thorough documentation includes full preparation instructions and lots of tips to help you in your everyday work with our highly resistant *easyPROTECT* protection varnishes.
